UNSURPASSED QUALITY

Our quality control program is in place throughout the **CNC manufacturing process**. Every custom tool is precisely checked to ensure **unmatched quality** and **consistent delivery**.

We manufacture in Carbide, HSS and Coolant-Fed materials **on state-of-the-art CNC machines**.

From complete customs made from a blank to the **modification of standard tooling** to enhance the function of off-the-shelf tooling. **Material Specific Tool Geometries** and **Edge Preps** are applied along with the **most advanced PCD Coatings**.

- ▲ Back Deburring Mills

- ▲ Engravers
- ▲ Multi-Step Tools
- ▲ Port Contour Cutters
- ▲ Step Drills
- ▲ Tapered Tooling
- ▲ Threading Inserts
- ▲ Top Notch Style Grooving Inserts
- ... and more

If your COMPANY has a *Unique Milling CHALLENGE*, then **WE'RE THE COMPANY TO TURN TO**

WHAT OUR CUSTOMERS SAY

We have been using Valley Tool's custom tool and reconditioning services for over a decade. We are more than satisfied with their high standards and willingness to please their customers. We see it in the performance of their tooling. The combination of their next-day delivery and the pricing of their products is second-to-none. Valley Tool is always ready to take on any new project we might have to help reduce machining costs and increase production. Our future with Valley Tool is very positive. THANK YOU to everyone at Valley Tool for everything you do.
