**RECONDITIONING YOUR DULL
CUTTING TOOLS TO “LIKE NEW”
CONDITION & PERFORMANCE.**

COST SAVINGS

Valley Tool reconditions **ALL BRANDS** of High Performance Carbide Drills and Variable Helix End Mills. Utilizing high precision CNC machines, drill point geometries and helix angles are duplicated. The most advanced edge preps and PVD coatings are then applied providing you substantial cost savings vs. buying new.

**prompt
DELIVERIES**

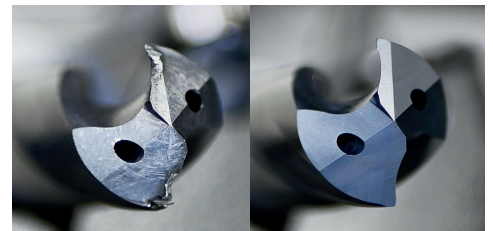

VALLEY TOOL SHARPENS ALL BRANDS:

Garr	IMCO	OSG	SGS	YG-1
Gorilla	Iscar	Sandvik	Sumitomo	... & more
Guhring	Kennametal			
Hanita	M.A Ford			
Helical	Mitsubishi			

ALL BRANDS

BEFORE

AFTER

Our **PROMPT DELIVERIES** reduce the amount of on-hand inventory required. Our unique grinding process provides a longer lasting tool that results in a higher volume of parts per edge and significantly less downtime. Rush services available.

STATE-OF-THE-ART CNC MACHINERY

Our advanced CNC Grinding machines give you the correct tool geometry each and every time. We maximize the life of each tool by removing the least amount of material that will result in less down time and fewer tool changes. Each tool is ground to the original manufacturer specifications (OMS) and the exact tool geometry is maintained to maximize tool life.

INSPECTION REPORTS

All tools serviced are inspected on our state of the art Zoller Genius 3. Ensuring our customers receive reconditioned tools that meet or exceed their expectations. Results can be printed for your inspection reporting.

GETTING STARTED WITH 4 EASY STEPS

NO PRE-SORTING. NO STRESS. NO SURPRISES.

STEP 1

Simply place your dull cutting tools in a box.

STEP 2

Ship them to Valley Tool.

STEP 3

Receive a quote for tool reconditioning service.

STEP 4

Receive your tools in “like new” condition.
